Audience and prerequisites

Target audiences

- Cloud architects, cloud engineers, and operations specialists
- Individuals who want to install and operate Apigee hybrid

Prerequisites

- Familiarity with Linux commands and command line interface
- Basic understanding of Google Cloud
- Basic understanding of GKE
- Basic understanding of networking
- Basic understanding of shell scripts, XML, JSON, HTTP, REST, and TLS

Google Cloud

Target Audiences:

- Cloud Architects and Cloud Engineers.
- Individuals that want to install and operate Apigee hybrid.

Prerequisites:

- Familiarity with Linux commands and command line interface.
- Basic understanding of Google Cloud.
- Basic understanding of GKE.
- Basic understanding of networking.
- Basic understanding of shell scripts, XML, JSON, HTTP, REST, and TLS.

What you will learn...

Product fundamentals

Apigee hybrid architecture

Installation and operation of Apigee hybrid

Deployment and environment management

Security

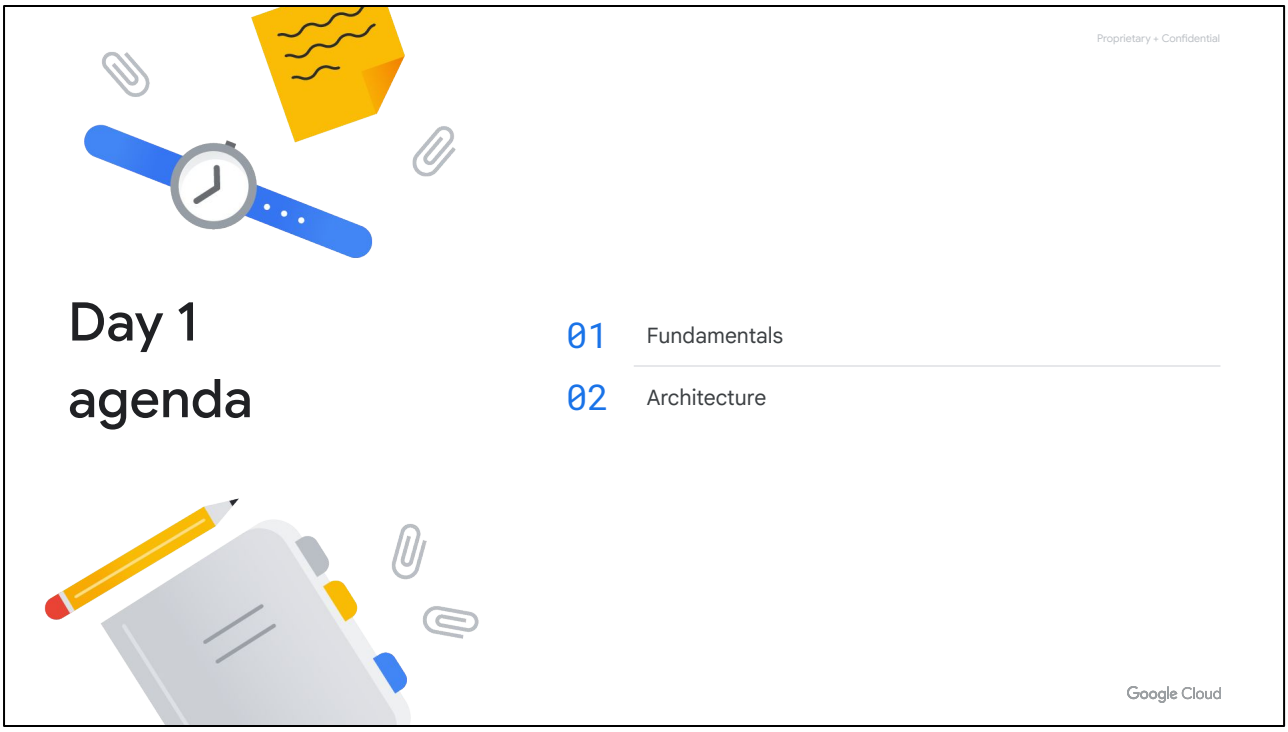
Capacity planning and scaling

Upgrading Apigee hybrid

Logging and monitoring

Google Cloud

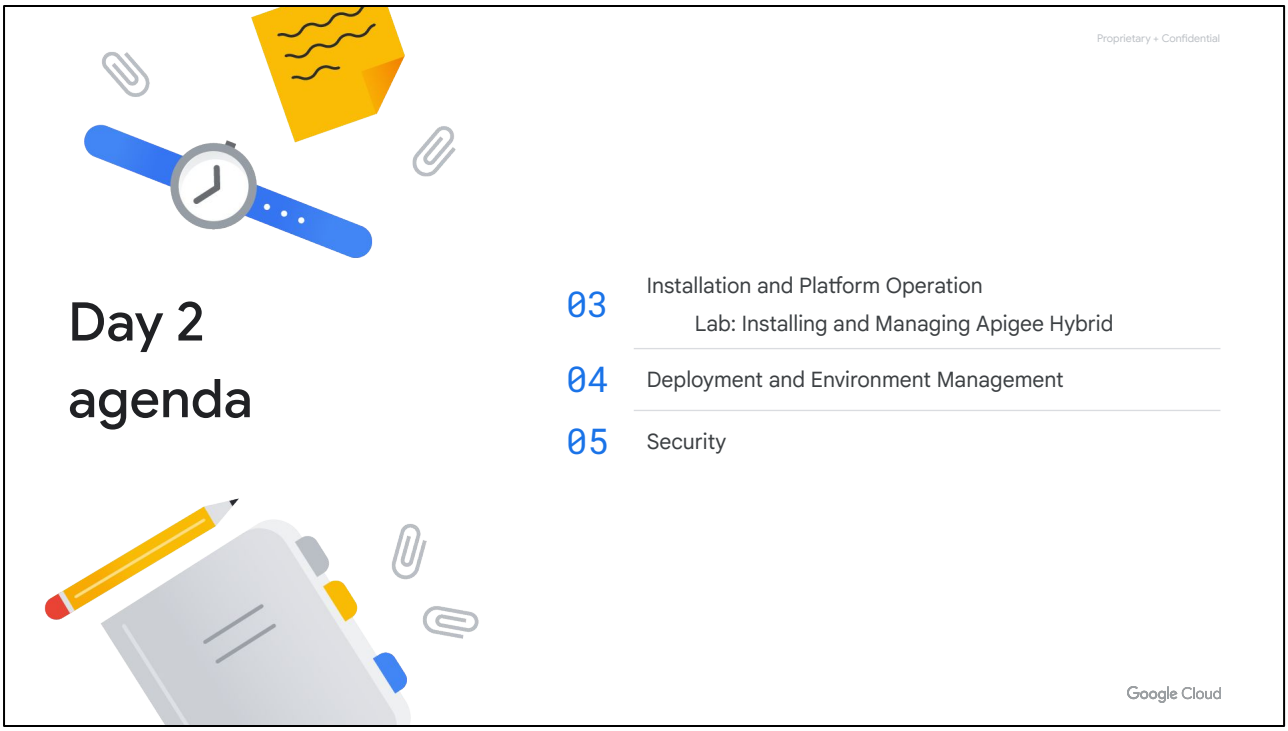
Through presentations, demonstrations, and hands-on labs, you will learn how to install and operate the Apigee hybrid platform on Google Cloud. The course will cover the architecture, installation process and the techniques to manage and monitor the hybrid runtime system.



This course consists of 8 modules and 1 lab.

On Day 1, we will aim to cover the following 2 modules:

1. Fundamentals
2. Architecture

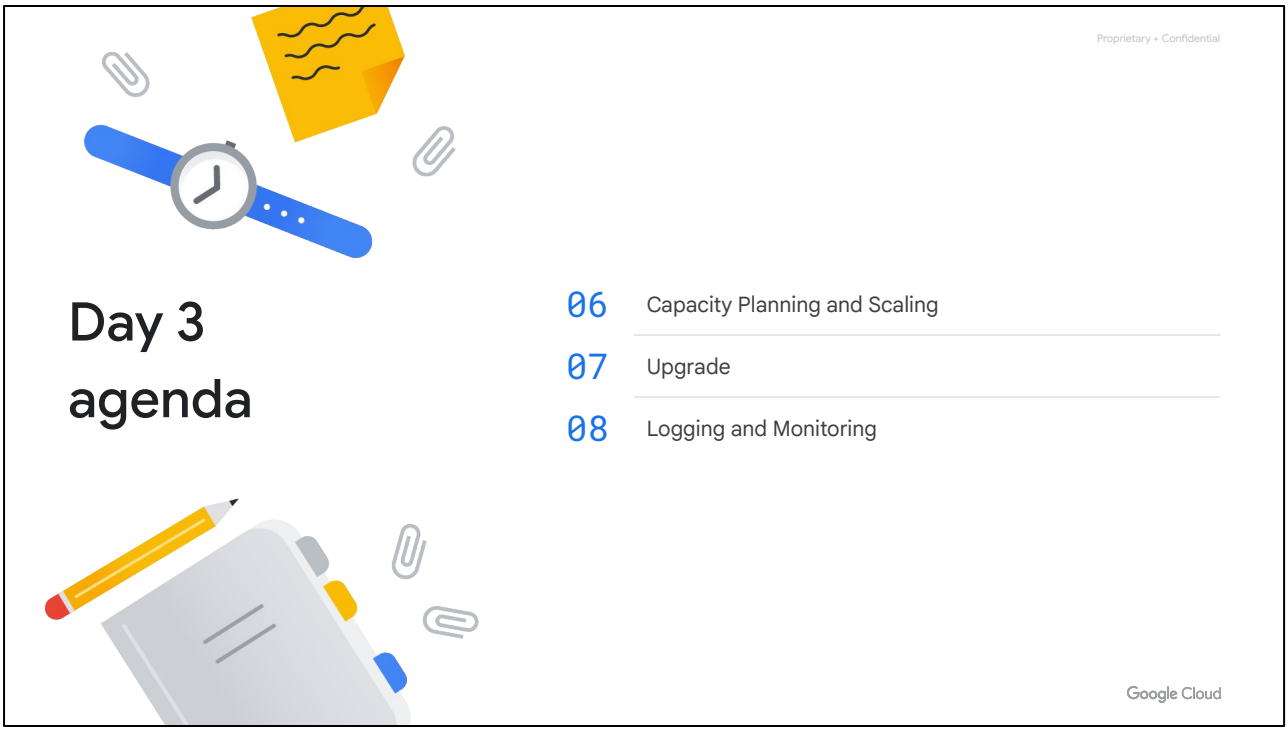


On Day 2, we will we will aim to cover the following 3 modules:

3. Installation and Platform Operation
4. Deployment and Environment Management
5. Security

You will also implement the lab:

- Installing and Managing Apigee Hybrid



On Day 3, we will we will aim to cover the following 3 modules:

6. Capacity Planning and Scaling
7. Upgrade
8. Logging and Monitoring

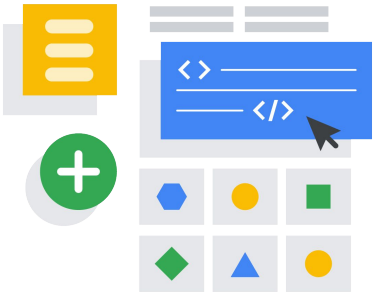
Lab environment

For each lab, Google Cloud Skills Boost offers:

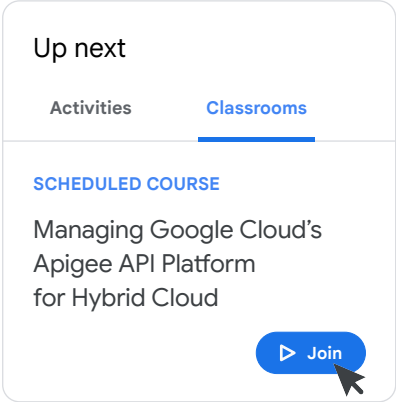
- A free set of resources for a fixed amount of time
- A clean environment with permissions



Proprietary + Confidential

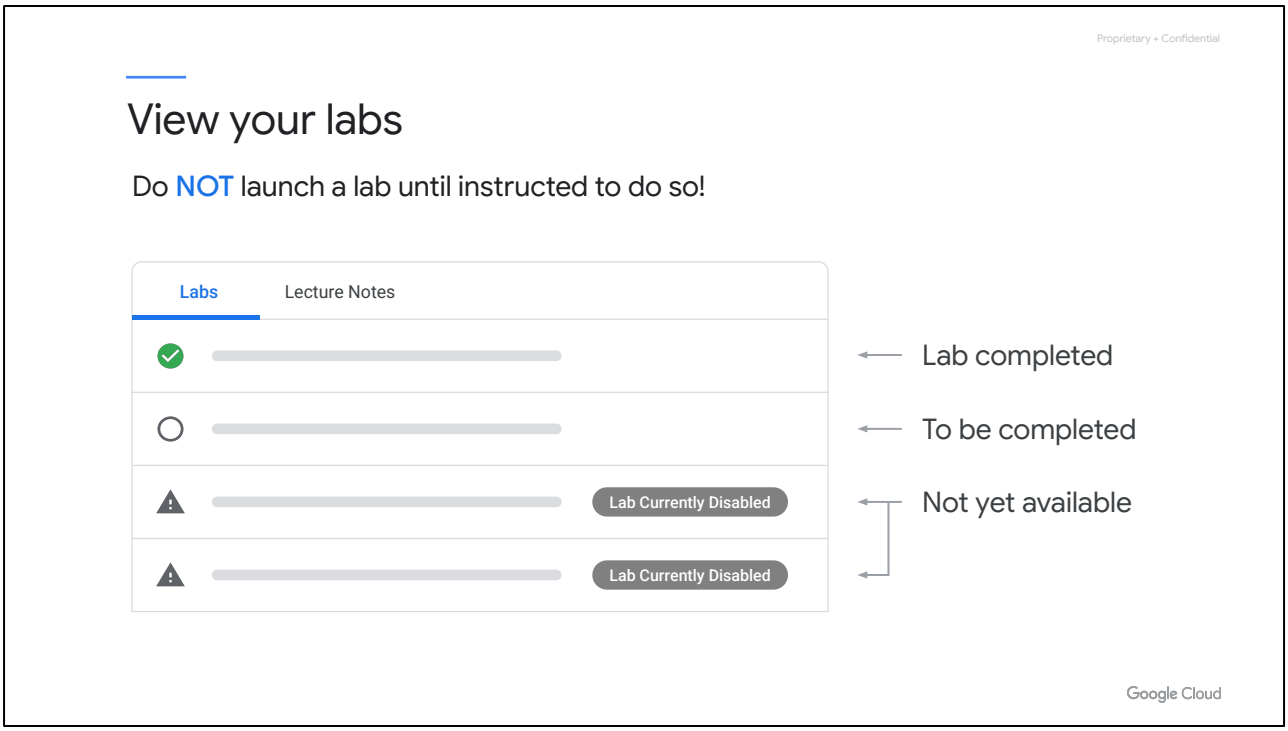
Open Cloud Skills Boost

1. **Open an incognito window** (or private and/or anonymous window).
2. **Go** to the URL your instructor provides.
3. **Sign In** with existing account or **Join** with new account (with email you used to register for the course).
4. Launch the course from the **Dashboard page**.



Access issues

The process to open Cloud Skills Boost can differ based on credentials used. Please reach out to your instructor if you have any access issues.



After you launch the course, you can view your labs. As shown in the sample, the list of labs indicate if a lab is:

- Completed (by you)
- Active
- Or not yet available

Your instructor will let you know when it’s time to launch a lab. Once you start a lab, you won't be able to pause and restart it, so you'll need a continuous block of time to complete the work.
