Scenario

Scenario

Deploying Google Workspace

- During this course you will follow the Hibeq group as they deploy Google Workspace for their organization.
- Hibeq is a financial services company involved in banking, insurance, and asset management.
- You are a Google Workspace deployment engineer working for the partner commissioned by Hibeq to manage the deployment project.
- Through a series of practical exercises you will work with the Hibeq team to advise and ensure that Google's deployment best practices are followed.
- As the deployment engineer, you will lead certain tasks such as configuring mail routing, along with setting up the Google directory sync and migration tools.
- You will also mentor the Hibeq administration team in areas such as security and compliance.

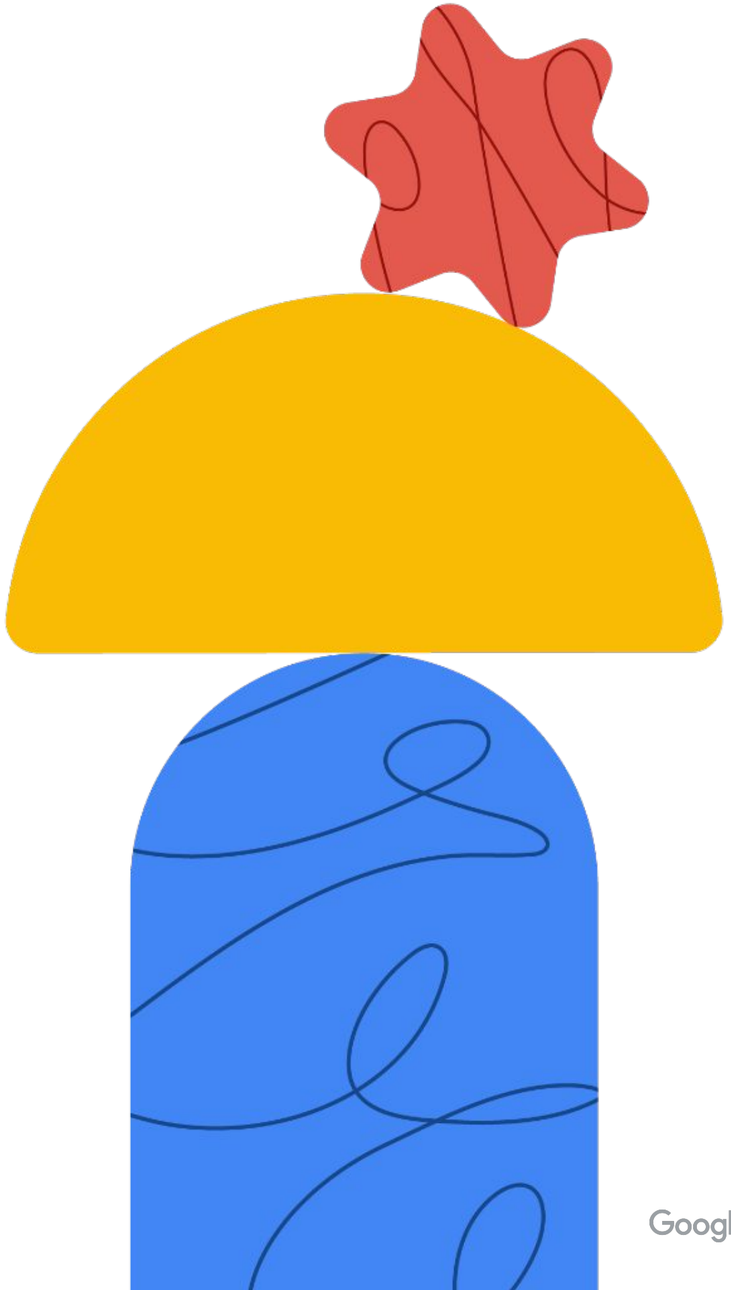
Environments



Proprietary + Confidential

Environments

- During any Google Workspace deployment, there is a period where some users will remain on the legacy platform, and others are using Google Workspace.
- This does inevitably present challenges in certain areas, but Google has developed best practices and guidelines which are covered on this course.
- As a Microsoft® customer, Hibeq uses Exchange for mail and Office for documents, spreadsheets, etc.
- During this course, you will use two different platforms, the first will mirror Hibeq's legacy (on premise) environment, and the second will be Google Workspace:

Proprietary + Confidential

Environments

Google Workspace

- A temporary Google Workspace Enterprise account provided by Google Cloud Skills Boost.

Important

- Once you start your lab on day 1, **DO NOT hit the Stop Lab button** until you have completed the final exercise on day 4.
- Stopping the lab destroys the Google Workspace account and you will not be able to restore the lab environment so you will be unable to undertake any more exercises without starting the entire lab again.

Proprietary + Confidential

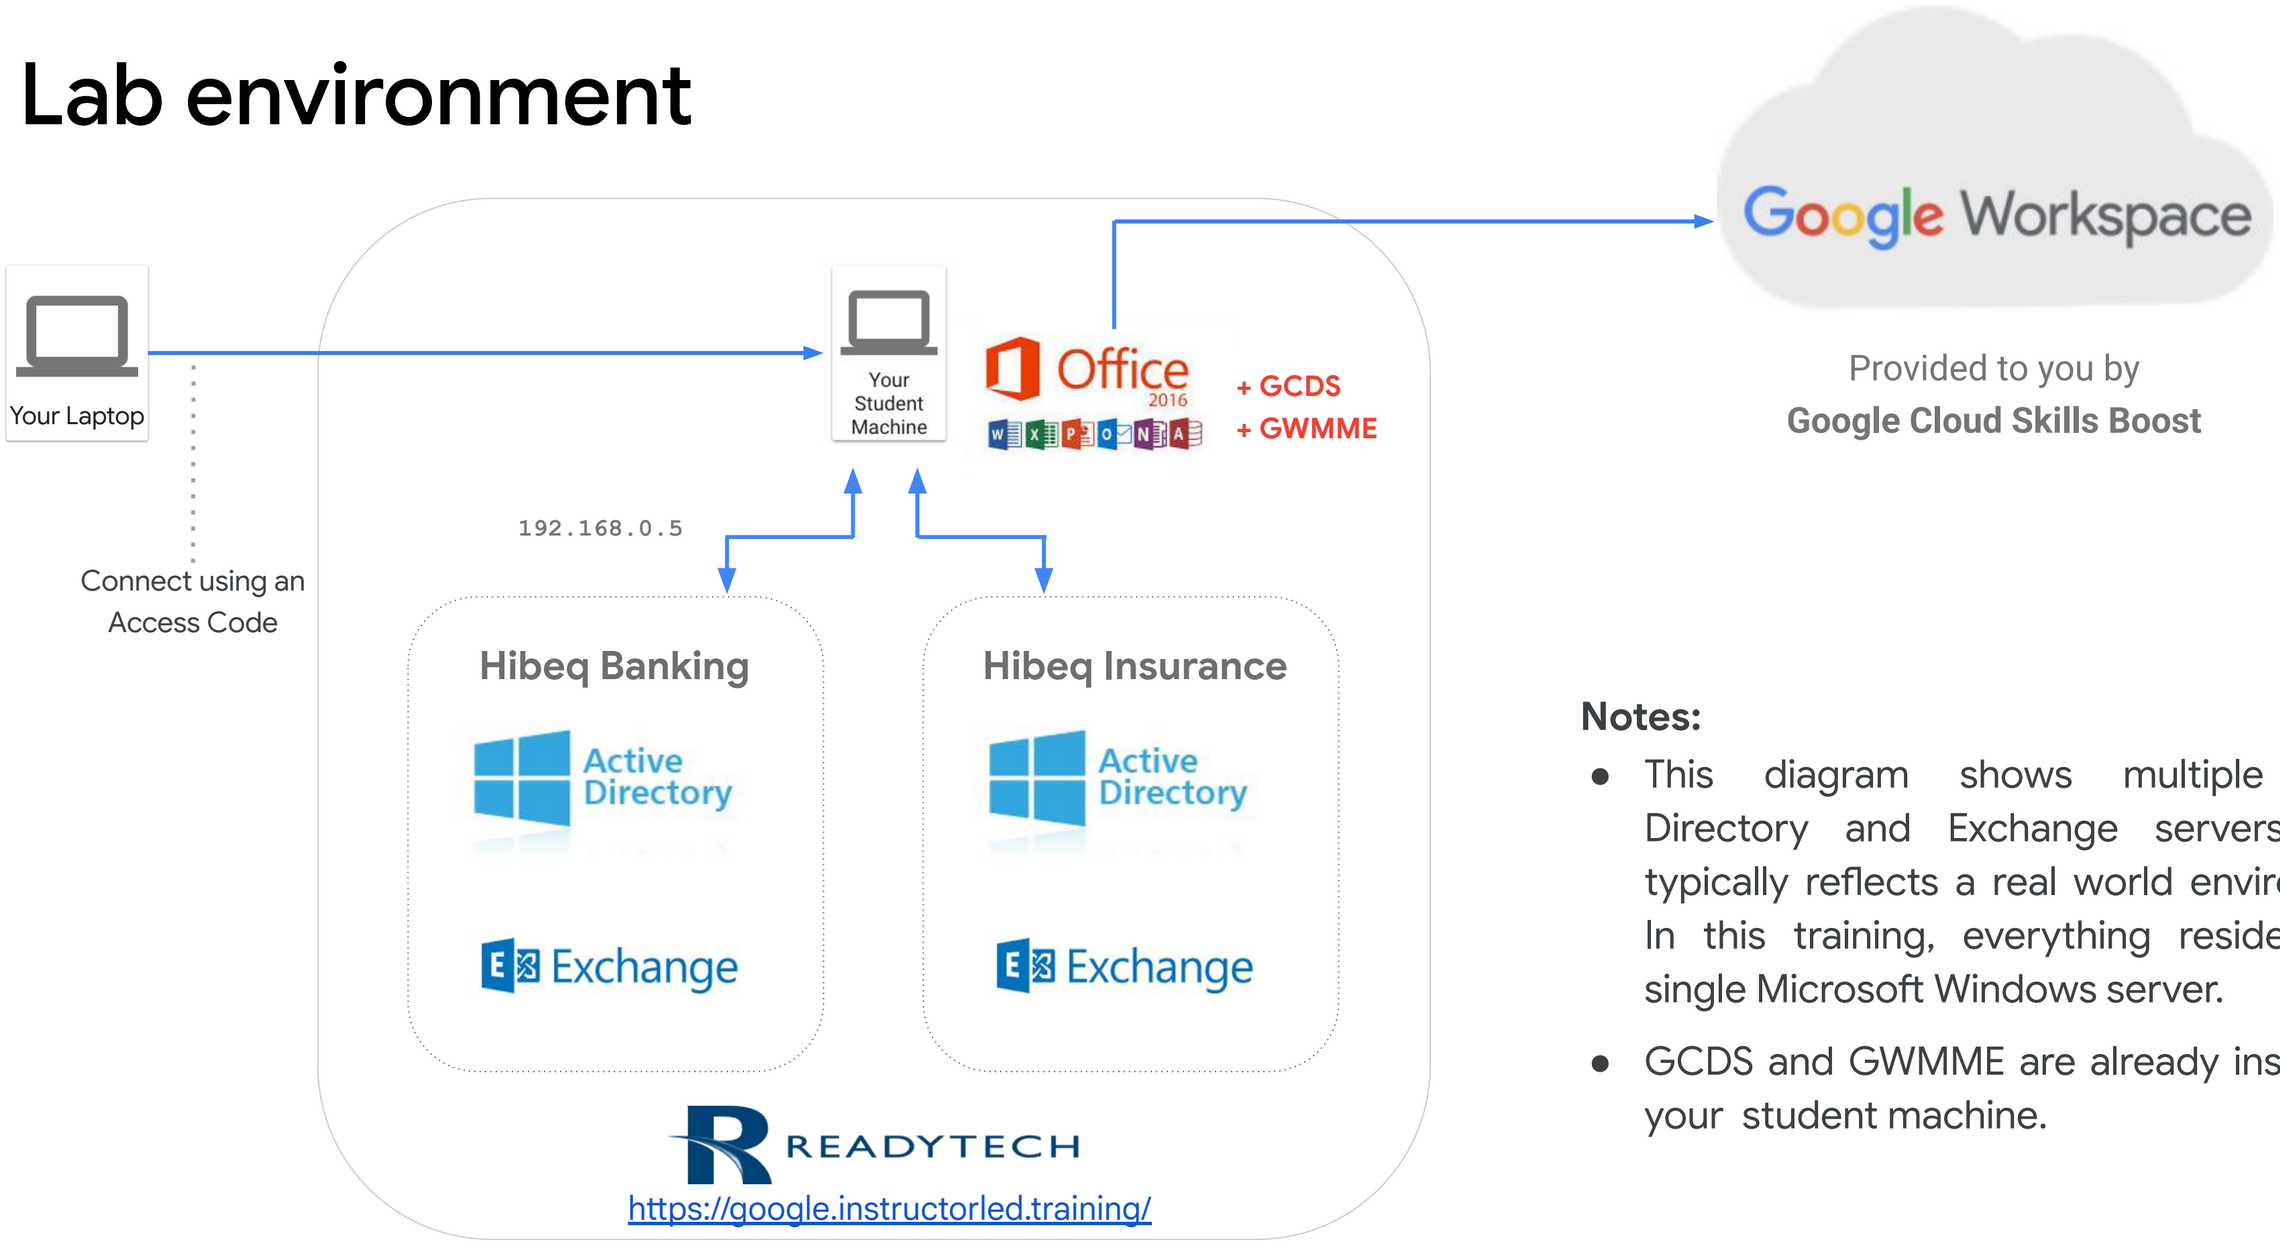
Environments

Hibeq legacy environment

- A virtual network (hosted by ReadyTech) includes an Exchange 2016 and Active Directory (AD) back end server and a dedicated Windows workstation for each student. Each workstation has been configured with Office 2013.
- The ReadyTech environment is required to complete part 1 to 4 only from Work Transformation (Google Workspace) lab so you will be using ReadyTech on day 2 and 3 of this course.

Proprietary + Confidential

Lab environment



Notes:

- This diagram shows multiple Active Directory and Exchange servers which typically reflects a real world environment. In this training, everything resides on a single Microsoft Windows server.
- GCDS and GWMME are already installed in your student machine.

Google Workspace environment

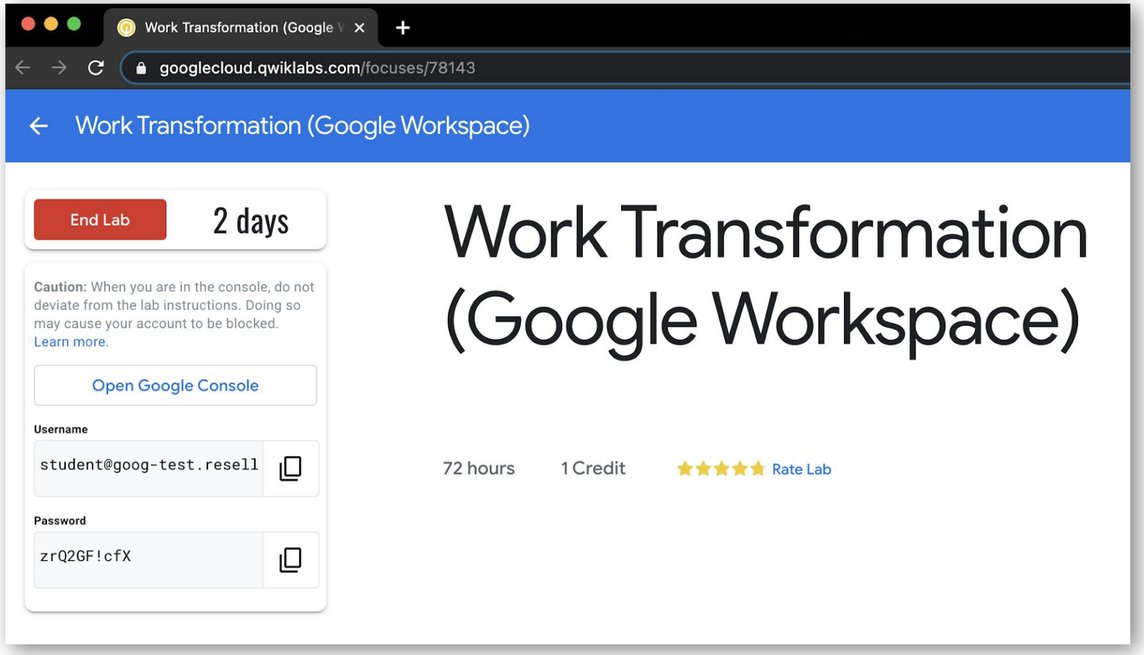
- As mentioned earlier, DO NOT hit the Stop Lab button until instructed to do so.
- This lab must run for the duration of the 4 day course.
- Identify your Google Workspace domain name and admin email address.
- Once you start the lab, your Google Workspace administrator user name and password will be displayed on the left. Copy these values to a safe place.

Proprietary + Confidential

Google Workspace environment

Identify your Google Workspace domain name and admin email address.

Once you start the lab, your **Google Workspace Administrator username** and **password** will be displayed on the left.



Proprietary + Confidential

Google Workspace environment

Identify your Google Workspace domain name and admin email address.

Important

Your **`[_your_googleworkspace_domain_]`** consists of the domain name that appears **after** `student@` in your username.

For instance, if `student@goog-test.reseller.gappslabs.co.s-elp1huxd.qwiklabs-gsuite.net` were your username, `goog-test.reseller.gappslabs.co.s-elp1huxd.qwiklabs-gsuite.net` would be your **`[_your_googleworkspace_domain_]`**.

Copy these values to a safe place.

Google Workspace environment

Identify your student name and assigned department

- Throughout the exercises you will be asked to enter information which is specific to your student profile.
- The table below details these values and what must be entered in their place.

Value	What you should enter	Comments
`[YOUR_GOOGLEWORKSPACE_DOMAIN]`	Your Google Cloud Skills Boost' Google Workspace domain name	Do not include the https:// prefix
`[YOUR_STUDENT]`	Your student email address excluding the domain name. **This will be assigned by your instructor.**	Example: **student12**
`[YOUR_DEPARTMENT]`	Your department	**Finance**, **IT**, **Legal**, **Marketing**, **Sales** or **Support**

Google Workspace environment

Use the table below to determine your department:

Students	Department
1-8	Finance
9-16	IT
17-24	Legal
25-32	Marketing
33-40	Sales
41-48	Support
